FRONT STREET UNITED METHODIST CHURCH BURLINGTON, N.C.

photo by Joe Robertson of Westbrook Studios Inc.

The first Methodist church on Front Street was built in 1888. It was replaced in 1912 by a larger building, which was destroyed by fire in 1949. The present colonial-style building was completed in 1952, with seating for about 700.

The organ is placed on either side of the chancel, with two matching cases designed by Didier Grassin. The Great and Choir Organs are on the right-hand side, the Swell Organ is on the left, and the Pedal stops are divided on both sides. The console is detached and mobile.

The church's choral programme, covers a wide repertoire and includes much English music of the nineteenth and twentieth centuries.

The large congregations gain leadership and encouragement from the organ, in a rather challenging acoustic: the warmth and vigour of English romantic voicing is ideal for these circumstances. Wind pressures range from 3¼" for the Choir Organ to 12" for the grandiloquent enclosed Tuba.
