

EMMANUEL UNITED REFORMED CHURCH CAMBRIDGE

The organ was built by Henry Willis in 1880: it is his only organ in Cambridge. It was rebuilt in 1911 by Norman & Beard, who installed pneumatic actions and added a Choir Organ. Most of the Father Willis organ survived, however, including the console, soundboards and pipework.

The organ was restored by Harrison & Harrison in 1992. The 1911 additions have been removed, and the original two-manual specification reinstated; changes to the voicing have been reversed. New tracker actions for the manuals and couplers have been made in the style of Father Willis; the Pedal Organ remains pneumatic, as originally, and a new independent Trombone has been added.

PEDAL ORGAN

Open Diapason	(wood)	16
Bourdon		16
Trombone	(new)	16

GREAT ORGAN

Open Diapason	8
Open Diapason	8
