

ST BRANDON'S CHURCH, BRANCEPETH COUNTY DURHAM

The organ's early history is not known. It was built by Henry Willis, probably in the 1870s for a private house. By 1884 it had been installed in St Luke's Chapel, Winterton Hospital, near Sedgefield in County Durham. It has been in the care of Harrison & Harrison since 1911, and is almost entirely unaltered.

St Brandon's Church has been splendidly rebuilt following a disastrous fire in 1998, which destroyed its wonderful seventeenth-century interior and its 1935 Harrison organ. In 2005 the Winterton organ was restored and installed under the tower at the west end of the church.
