

THE GRAND TEMPLE, FREEMASONS' HALL GREAT QUEEN STREET, LONDON WC2

Freemasons' Hall is the headquarters of the United Grand Lodge of England. The present Hall dates from 1932, and is one of the finest Art Deco buildings in the country. The Grand Temple seats 1700 people.

The organ was built for the new Hall by Henry Willis & Sons in 1933. The original pipework is divided in two chambers on either side of the auditorium. The comprehensive work of 2014-15 included restoration of the Pitman chests and electro-pneumatic actions. To give the organ greater projection into the auditorium, the Grand Organ chorus and Tuba have been added within a third case, placed centrally and designed to match the original pair.
